

ROQUETTE ENVIRONMENTAL POLICY

For 90 years, Roquette has successfully produced plant-based ingredients and excipients that address unique and essential nutrition and health needs, benefiting both people and animals. Our commitment extends beyond business, as we aim to contribute to **creating a better and healthier future for all generations**. As such, we place **sustainable development at the core of our strategy**.

With a global industrial footprint that serves several market segments worldwide, **we recognize the impact of our activities on the environment and the climate. We are fully committed to minimizing it.**

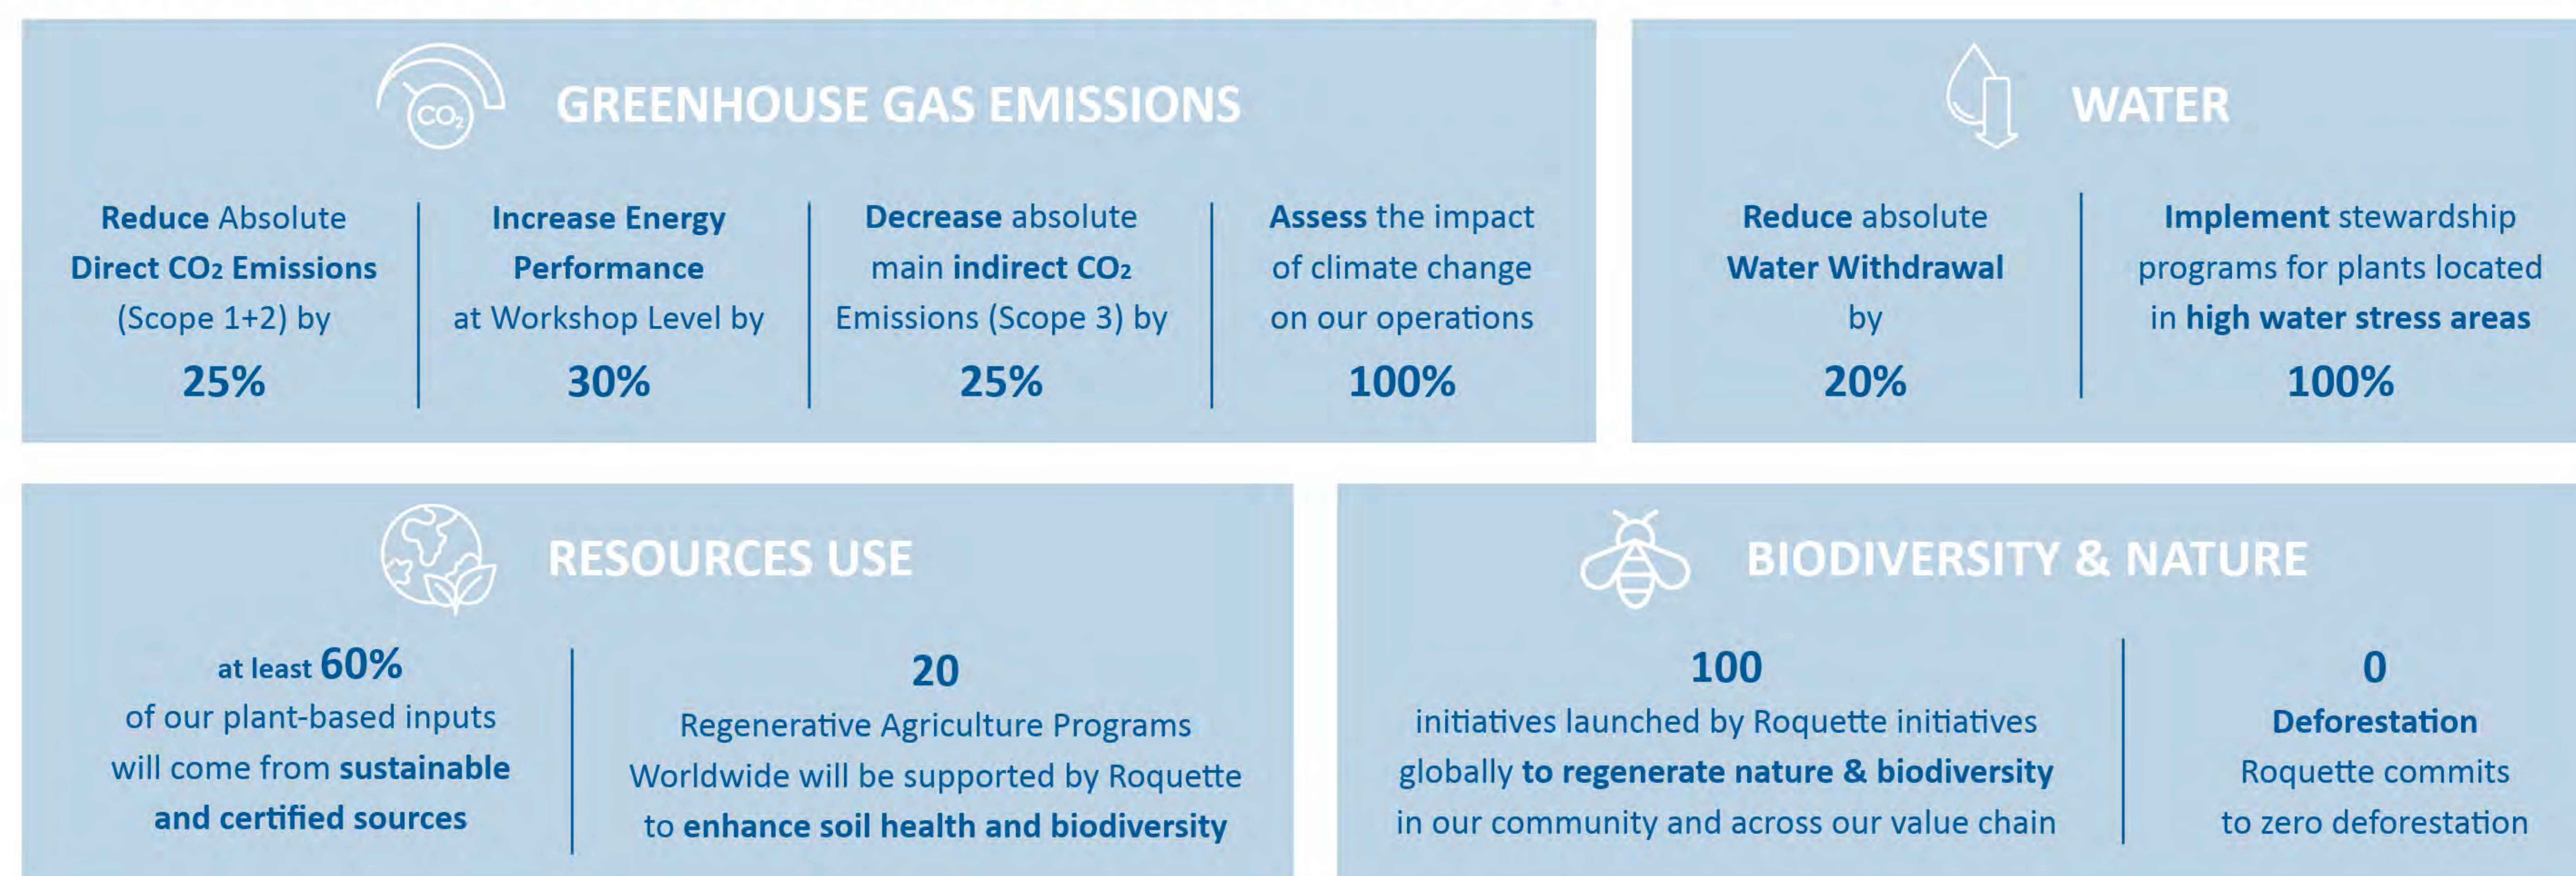

To that extent, the Group has launched a sustainability program named **“life+nature”*** by 2030.

In particular, the first engagement platform, named **“Preserve the Planet”**, focuses on 2 main areas:

- **Mitigation:** Roquette adheres to the goals of the Paris Climate Agreement (COP 21) to **hold global temperature increase to well below 2°C** above pre-industrial levels and has defined a specific decarbonization roadmap.
- **Adaptation:** in the event of climate hazards, we aim to **protect and adapt our infrastructures and production sites, secure access to water and raw materials.**

ENVIRONMENTAL TARGETS

Compared to our baseline of 2021, we aim to achieve the following by 2030:

CONTINUOUS IMPROVEMENT, COMPLIANCE AND PEOPLE ENGAGEMENT

We will achieve our targets through methods, discipline, and ongoing efforts. Therefore, we are committed to continuously **improving our environmental performance, including preventing pollution and implementing best-in-class practices** across all operations.

Moreover, every new product, innovation, or process is assessed **in the light of its environmental impact** and developed through an eco-design approach to offer more sustainable solutions to our customers.

Roquette strives for strict compliance with environmental legislation and adheres to the best environmental standards.

We raise awareness among our employees, contractors, and other key stakeholders through specific environmental communication campaigns and training sessions.

Finally, **we allocate** appropriate human, technological and financial **resources** to improve our environmental performance and rely on everyone’s engagement within the company.

These principles apply and are implemented throughout the entire organization of Roquette.

Pierre Courduroux
CEO
